Summary

- Results-driven Frontend Developer with a strong foundation in developing dynamic and scalable web applications. Proficient in the React.js ecosystem and modern JavaScript technologies. Passionate about creating high-performance, user-centric solutions while continuously expanding expertise across MERN stack technologies.

Education

Saraswati College of Engineering

Oct 2021 – May 2024

Bachelor of Engineering - Information Technology

Navi-Mumbai

- Passionate individual equipped with the skills in the domain of full stack web development and data analytics. Eager to contribute to a multidisciplinary team and engage in the life cycle development of multi-tier web applications, exploring innovative interactions and technologies. Ready to leverage technical skills and enthusiasm to drive impactful solutions.

Vidyalankar Polytechnic

Aug 2018 – June 2021

Diploma Engineering - Information Technology (92.50 %)

Mumbai

- Diploma in Information Technology typically includes foundational and advanced subjects related to IT, programming, networking, and software development.

Experience

RST Forum

Jan 2025 – April 2025

Full Stack JavaScript Developer Training

Mumbai

- Gained hands-on experience in modern web architectures, building interactive and responsive UIs with HTML, CSS, JavaScript, and React.
- Developed server-side applications using Node.js and managed databases with MongoDB for efficient data handling.
- Implemented RESTful APIs and security best practices to enhance web application security.

Trivia Softwares

Feb 2023 – May 2023

Python Developer Intern

Thane

- Developed a Management System Design Project utilizing Tkinter for GUI, SQLite3 for database integration, and PDBC for efficient data handling.
- Gained hands-on experience in Data Science, including data extraction, analysis, and visualization.
- Strengthened Python 3.x proficiency by implementing various functionalities in real-world projects.

Technical Skills

Frontend: React.js, JavaScript (ES6+), HTML5, CSS3.

Core React Libraries: React Route.

UI Libraries: Tailwind CSS.

API Integrations: REST APIs, Axios, Fetch API.

Backend Knowledge: Node.js, Express.js, MongoDB, Mongoose.

Projects

Anti-Counterfeit Product Identification Blockchain. | *React.js, Python, Solidity, Node.js, Hardhat* | 

- This project effectively addressed the global issue of counterfeiting by providing secure and transparent tracking and verification of product authenticity throughout the supply chain using smart contracts deployed on the Ethereum blockchain.

Multiple Disease Prediction Using ML. | *Python, Django, TensorFlow.* | 

- Developed a sophisticated multiple disease prediction system to assist healthcare professionals in early diagnosis and proactive management of various medical conditions.
- Leveraged machine learning algorithms and patient data analysis to predict the likelihood of multiple diseases based on symptoms, medical history, and demographic factors.
